

## Errorzone

Vein

Take in  
Repulse  
Search for the oxygen  
It comes and goes like the promise of addiction  
Suppress and explode  
Reload the pain into passion  
Pull the verve from the hurt, and evolve through  
Destruction

Something itches  
Something begs you to break the form  
Splint the elbow  
Break the cheek on the palm  
Look at these eyes blur and gase out the panes  
I see something you don't  
I see something that you can't

No medicine  
No remedy  
No paradise eternity  
Embrace the human form  
Enter the errorzone

In this spiral of depress and desire  
I want to erase myself and set this world on fire

So far I see something more  
I reach out and touch but  
It's out of my hands  
It's out of my head
