

dark place

venbee

I'm off my face that says it all
Maybe I'll change, but my tea's gone cold
From the moment I wake I won't sell my soul
But I'm close enough to hell for me to know

They say you find heaven in a dark place
My heart is 150 in the fast lane
My friends are in the back, they're doing cocaine
Not a calm state but that's okay

They say you find heaven in a dark place
My mumma use to say you learn the hard way
My friend is chatting up another barmaid
For fucks sake but that's okay
He's trying to find heaven in a dark place

They say you find heaven
They say you find heaven in a dark place

Now I'm stuck with Jesus, can't find my way home
Don't dance with the devil, just leave him alone
I know I got dealers, they're belling my phone

We found ourselves but we're lost in rave
I can't remember if my song was played
I know I shouldn't say his name in vein

They say you find heaven in a dark place
My heart is 150 in the fast lane
My friends are in the back, they're doing cocaine
Not a calm state but that's okay

They say you find heaven in a dark place
My mumma use to say you learn the hard way
My friend is chatting up another barmaid
For fucks sake but that's okay
He's trying to find heaven in a dark place

They say you find heaven
They say you find heaven in a dark place

They say you find heaven
They say you find heaven in a dark place
My heart is 150 in the fast lane
My friends are in the back, they're doing cocaine
Not a calm state but that's okay

They say you find heaven in a dark place
My mumma use to say you learn the hard way
My friend is chatting up another barmaid
For fucks sake but that's okay
He's trying to find heaven in a dark place
