

## Defy The Tyrant

### Venom Prison

Six thousand years of pain  
I have learned to know you  
You were, you are and always will be  
The jealous rival, tyrant of Prometheus  
Tormentor of my reason  
Specter of conscience

Spread the plague upon the land  
Decimate the enemy, crush the rest in your hand  
Plant a burning cross in the holy soil  
In the name of god - resurrection of moral coil  
Slaves on earth because in heaven is a master  
Waiting for your martyr to bring disaster  
Rape and massacre - ceremonies of purification  
Paying the price for eternal salvation

Infiltrate the infidels, spread your disease  
Kill sons and force mothers to their knees  
Let it rain, the flood will carry sins away  
This is the downfall of creation - Let us pray

The sins we ask you to forgive, you caused us to commit  
There is no love, just pure unadulterated evil
