

Down Below

VENUES

I gave you everything I got
But it was not enough
To make you stay
Out of your own prison

On and on we're driftin' down below
Though we are expecting nothing more

How did we make it all the way down here
How come we can't get out
It's gonna take a lot

Black and grey is all we see
Losing the feeling, no time for healing
Captured in this hell
To live and die inside this curse
Is nothing to keep, it's time to believe in
What we got in us

I know I did lose you again
I lost myself this time
So torn apart
Beggin' for one more chance

Now In this bottleneck we're caught
No chance to fight this illusion, no

How did we make it all the way down here
How come we can't get out
It's gonna take a lot

Black and grey is all we see
Losing the feeling, no time for healing
Captured in this hell
To live and die inside this curse
Is nothing to keep, it's time to believe in
What we got in us

I lost you again
While trying to not lose myself
One more time

I lost you again
While trying to not lose myself
One more time

I lost you again
While trying to not lose myself
One more time

So I'm sitting here again and all alone
With all the thoughts and the fights on my mind
Wishing I could bring an end to all this pain
I tried so hard and all I got was rejection

Just a shadow of myself now in the mirror
Tired eyes, aggressively slim

Forever taking pills, forever taking drinks
So sick of me, but even sicker of you

Black and grey is all we see
Losing the feeling, no time for healing
Captured in this hell
To live and die inside this curse
Is nothing to keep, it's time to believe in
What we got in us
