

Nights Like These

VENUES

So far from perfect
But it's still where everyone belongs
This is what we call our home
The city tonight will
Reflect our broken hearts

Sharp like shattered glass
Living a fiction won't spill the truth out
All we ever wished for
Was just a place
Where we could be ourselves

Have you ever wished to touch the sky
Have you ever felt like burning inside
That's gonna be the night of your life
Have you ever wished to touch the sky
Have you ever felt like burning inside
That's gonna be the night of your life

Life in a fast lane
We crossed the line a way too far this time
Nothings there to hold us down
The city tonight will
Reflect our broken hearts

Sharp like shattered glass
Living a fiction won't spill the truth out
All we ever wished for
Was just a place
Where we could be ourselves

Have you ever wished to touch the sky
Have you ever felt like burning inside
That's gonna be the night of your life
Have you ever wished to touch the sky
Have you ever felt like burning inside
That's gonna be the night of your life

You look good on me baby
So let me show you how to move
Even if life sometimes
Seems so lame
We make the rules
This is our game
A game where everybody is a winner
Streets are the places we call our home

Have you ever wished to touch the sky
Have you ever felt like burning inside
That's gonna be the night of your life
Have you ever wished to touch the sky
Have you ever felt like burning inside
That's gonna be the night of your life
