

# We Are One

VENUES

With a smile as camouflage  
Breathe in the gazes on you  
With your mind on your side  
Breathe out and shout  
That every single thing we do  
Every single thought we have  
Every single pain we feel  
Makes us who we are, we are, we are

We will take this world by storm  
Sharing this one heart and lung  
We are the voice of a thousand strong  
We will shout, we will shout out loud

When you feel all alone  
Remember we are one and more  
Together we will be alright  
And it feels like home  
When you're left on your own  
Feel the heartbeats of us all  
You are one, we are one  
And yet so many more

This is where we fight them back and  
This is where we all stand strong  
Not ashamed to show our scars yet  
And we'll sing  
Breathe out and shout  
That every single thing we do  
Every single thought we have  
Every single pain we feel  
Makes us who we are, we are, we are

We will take this world by storm  
Sharing this one heart and lung  
We are the voice of a thousand strong  
We will shout, we will shout out loud

When you feel all alone  
Remember we are one and more  
Together we will be alright  
And it feels like home  
When you're left on your own  
Feel the heartbeats of us all  
You are one, we are one  
And yet so many more

I swear  
Tonight I will keep my promise  
To make you whole and erase the past  
Look to the sky and take my hand  
This is a promise that will last  
Tonight I will keep my promise  
To make you whole and erase the past  
Look to the sky and take my hand  
This is a promise that will last

When you feel all alone  
Remember we are one and more  
Together we will be alright  
And it feels like home  
When you're left on your own  
Feel the heartbeats of us all  
You are one, we are one  
And yet so many more

When you feel all alone  
Remember we are one and more  
Together we will be alright  
And it feels like home  
When you're left on your own  
Feel the heartbeats of us all  
You are one, we are one  
And yet so many more
