

There's a New World over the Skyline

Vera Lynn

There's a new world over the skyline
To find it, follow the sun
You'll find it brighter
Your heart much lighter
And you'll have trouble on the run

There's a new song on the horizon
That we'll sing together as one
In the new world over the skyline
Where the skyline meets the sun

Though the night of waiting may seem endless
And the far horizon seemed forlorn
Over the rim
The stars are growing dim
So lift your weary eyes towards the dawn

There's a new world over the skyline
To find it, follow the sun

You'll find it brighter
Your heart much lighter
And you'll have trouble on the run

There's a new song on the horizon
That we'll sing together as one
In the new world over the skyline
Where the skyline meets the sun

There's a new world over the skyline
To find it, follow the sun
You'll find it brighter
Your heart much lighter
And you'll have trouble on the run

There's a new song on the horizon
That we'll sing together as one
In the new world over the skyline
Where the skyline meets the sun
