

Light It Up

Veridia

I just wanna be there when you start to light it up
I'll be right behind you, we can watch it all burn up

Took it all
Craving more
Don't know what they're fighting for
Building blocks
Toy with war
They don't get the metaphor
Optimistic arsonist
The fire in you is contagious
Taking shots
Keeping score
Make it stop, can't take no more

I just wanna be there when you start to light it up
I'll be right behind you, we can watch it all burn up
So gimme that fire
Don't let it die
Let it rise, oh
So gimme that rush
It could save us
If we just start to light it up

Make a noise
Sing it out
Scream until the walls go down
Up in smoke
Fear and doubt
Be the voice that moves a crowd
Optimistic arsonist
The fire in you is contagious
Taking shots
Keeping score
Make it stop, can't take no more

I just wanna be there when you start to light it up
I'll be right behind you, we can watch it all burn up
So gimme that fire
Don't let it die
Let it rise, oh
So gimme that rush
It could save us
If we just start to light it up

Revo-revolution
Not just a moment
Light up all our demons
Need help and we know it
Come and be the voice of reason
If love was our currency
We could finally live in peace, yeah

I just wanna be there when you start to light it up
I'll be right behind you, we can watch it all burn up
So gimme that fire
Don't let it die

Let it rise, oh
So gimme that rush
It could save us
If we just start to light it up

(Start to light it up)
