

# Poppies

Veridia

I've been slow motion trippin'  
I been taking toxin to fix my problems  
But this don't work for me  
Don't need your sympathy  
(Aching more every day)  
I've been slow motion trippin'

I keep myself medicated  
To sleep away the pain  
Double dose 'til I'm dreaming sweetly  
But I need a change  
Even if I am asking for it  
Even if I beg  
No matter what I say  
Don't bring me poppies

I've been suppressing feelin'  
I been realizing the worst is in my head  
I can't escape from me  
Give myself some empathy  
(Nothing'll change until I change)  
I been, yeah, suppressing feelin'

I keep myself medicated  
To sleep away the pain  
Double dose 'til I'm dreaming sweetly  
But I need a change  
Even if I am asking for it  
Even if I beg  
No matter what I say  
Don't bring me poppies

Sorrow's a butcher  
I was up for the slaughter  
But the deeper it carved  
That hole in my heart  
The more joy I could contain  
So, bury the old me  
And if you bring poppies  
Throw them to the earth  
I need this rebirth  
I'm ready to love myself  
(I'm ready to love myself)

I keep myself medicated  
To sleep away the pain  
Double dose 'til I'm dreaming sweetly  
But I need a change  
Even if I am asking for it  
Even if I beg  
No matter what I say  
Don't bring me poppies  
Poppies, poppies, no
