

You've Never Been in Love with You

Vern Gosdin

You're telling me that I'll be just fine
That all I need is a little more time
And the reason you can't tell me what to do
You've never been in love with you

You've never been in love with you
You've never woke up next to me without you
And the reason you don't know I care for you
You've never been in love with you

You've never held your hand and walked through the park
You've never been without you in the dark
There's just one reason you don't hurt the way I do
You've never been in love with you

You've never been in love with you
You've never woke up next to me without you
And the reason you don't know I care for you
You've never been in love with you

And the reason you don't know I care for you
You've never been in love with you
