

Love You Less

Veruca Salt

I got this feeling and I hope it never ends
In the nighttime I'm your favorite,
in the daytime we're just friends
And you know that's how I want it, yeah
I really must confess
That I see myself more clearly when I love you less
I love you less

Don't you know that I can't see
When you stand in front of me
And you know that I can't breathe
When you're right on top of me
Can't you see that I'm lonely
When you're lying next to me

I feel so free (now that you're behind me)
Free (now that you're behind me)
Free

I count my blessings and I count my lucky stars
I can count you on my fingers
That's how small your are
And I'm really glad it's over, yeah
I'm glad I passed the test
Because I used to love you more
But now I love you less
I love you less

Don't you know that I can't speak
When you're talking over me
And you know that I can't breathe
When you're right on top of me
Can't you see that I'm lonely
When you're lying next to me

I feel so free (now that you're behind me)
Free (now that you're behind me)
Free

Falling over and I got you
It's like a habit and I have to
It never stops, no it never stops
But this equation's not about you
It's only math and I subtract you
You put the 3 before the 1, 2

I feel so free (now that you're behind me)
Free (now that you're behind me) [x8]
