

Collide

Vicetone

Swim with the tide
Watch it collide
Sing from the highlands
Your love's like an island
I just wanna get lost
Lay under stars
Dreams of the future
In front of our eyes

Front of our eyes
Front of our eyes
Front of our eyes
Front of our eyes, eyes, eyes
Front of our eyes
Front of our eyes
Front of our eyes
Front of our eyes

He's in the dark
Only I can see is glowing heart
Opens his lungs
And he's breathing every single star
I just keep on waking up
Reaching for his hand
Remember the moment
We knew this would never end

Swim with the tide
Watch it collide
Sing from the highlands
Your love's like an island
I just wanna get lost
Lay under stars
Dreams of the future
In front of our eyes

Front of our eyes
Front of our eyes
Front of our eyes
Front of our eyes

I'll just keep on swimming
'Til I see you again
Go back to the moment
We knew this would never end

Swim with the tide
Watch it collide
Sing from the highlands
Your love's like an island
I just wanna get lost
Lay under stars
Dreams of the future
In front of our eyes

Front of our eyes
Front of our eyes

Front of our eyes
Front of our eyes
