

# Landslide

Vicetone

Black waves where we used to stand  
Go on, give yourself a chance  
Rush away like an avalanche  
Look down on a lonely flame  
A few steps till the view has changed  
Broken eyes never see the same

I never saw it coming, landslide  
Carry us away, away, away  
In a landslide, in a landslide  
I disappear into a landslide  
Never be the same, the same, the same  
In a landslide, in a landslide

In a landslide, in a landslide  
In a landslide, in a landslide

Soaked up in a bloodshot haze  
Woke up with you in my veins  
I don't know how to let you fade  
Look down on a lonely flame  
A few steps till the view has changed  
Broken eyes never see the same

I never saw it coming, landslide  
Carry us away, away, away  
In a landslide, in a landslide  
I disappear into a landslide  
Never be the same, the same, the same  
In a landslide, in a landslide

In a landslide, in a landslide  
In a landslide, in a landslide

We're falling, we're falling, we're falling all the way  
We're falling, we're falling, we're falling all the way

I never saw it coming, landslide  
Carry us away, away, away  
In a landslide, in a landslide  
I disappear into a landslide  
Never be the same, the same, the same  
In a landslide, in a landslide

In a landslide, in a landslide  
In a landslide, in a landslide

We're falling, we're falling, we're falling all the way  
(In a landslide, in a landslide)  
We're falling, we're falling, we're falling all the way  
(In a landslide, in a landslide)  
We're falling, we're falling  
(In a landslide, in a landslide)
