

## Siren

Vicetone

Like a wake-up call from the darkest fall  
You've erased it all  
Suddenly I see all that love can be  
I can barely breathe

You are my revolution, my only one  
My life's a sick solution

And if you ever doubt it, how I feel about you  
I will scream it out into the night  
I'll shout it from the rooftops and I swear I won't stop  
'Til you hear this love fill up the sky  
Like a siren, like a siren

Over all the noise  
You're the only voice running through my head  
Music to my soul, deeper than it goes  
I lose all control

You are my revolution, my only one  
My life's a sick solution

Before you came along, all I felt was numb  
And when my heartbeat drums  
I hope you know it's for your love  
And if you ever doubt it, how I feel about you  
I will scream it out into the night  
I'll shout it from the rooftops and I swear I won't stop  
'Til you hear this love fill up the sky  
Like a siren, like a siren
