

The Otherside

Vicetone

Out there on the otherside
I have something to tell you
Can you k-keep it a secret
We were born for more than everyday, machines
So what are we chasin'
T-t-t-time is a wastin'
We're searching for the meaning

I was running, running
Coloring in the black and white
Everybody told me that is wasn't right
There's something coming
Feel it coming through the night
Out there on the otherside
Out there on the otherside
Out there on the otherside

I have something to show you
Can you c-carry the future
We break the night, with prisms in the light
So what are we chasin'
T-t-t-time is a wastin'
We're searching for the meaning

I was running, running
Coloring in the black and white
Everybody told me that is wasn't right
There's something coming
Feel it coming through the night

Out there on the otherside
Out there on the otherside
Out there on the otherside
Out there on the otherside
Out there on the otherside
Out there on the otherside

I was running, running
Coloring in the black and white
Everybody told me that is wasn't right
There's something coming
Feel it coming through the night

Out there on the otherside
Out there on the otherside
Out there on the otherside
Out there on the otherside
Out there on the otherside
Out there on the otherside
