

Electric Punishment

Vicious Rumors

We chose the hardest road
We took on rock roll
We watched the great ones rise
And fall before they died
it seems so long ago
Back then we didn't know
The prize that lies ahead
We would so long to get

EP plug me in turn me on again
EP I still need you
EP turn me up loud as hell
EP I still hear you

We felt invincible feeding on decibels
Too much to realize
Then make it twice that size
The damage takes its toll
And then your on your own
It's not for everyone
We've seen them cut and run

Thru it all your still here then your still free
Some might fade away but not you and me
You got one life to give all you got
Don't give it away
