

No Good

Victoria Monét

You'll say any and everything
So you can keep me in your space tonight
Every little teardrop
You just try to wipe off with one more of your lies

You're no good for me
You're no good for me

Ain't this some bullshit
I thought I was over it
So how did I end up right back over here
Almost moved on but you know what to do
To get under my skin and keep me under you
With the things you say to me

Said "If you love somebody, you just gotta hold tight"
"Come over baby, I'ma make you feel alright"
I like the words you say
You tell me even though I know

You'll say any and everything
So you can keep me in your space tonight
Every little teardrop
You just try to wipe off with one more of your lies

You're no good for me
You're no good for me

Ohh, you're no good
You're no good
You're no good
Ohh, you're no good
You're no good
You're no good
With the things you say to me

Said "If you love somebody, you just gotta hold tight"
"Come over baby, I'ma make you feel alright"
I like the words you say
You tell me even though I know

You'll say any and everything
So you can keep me in your space tonight
Every little teardrop
You just try to wipe off with one more of your lies

You're no good for me
You're no good for me
Ohh ohh no good
