

See The Light

Victoria Monét

No one in the world appreciates your attitude
No one
No one in the world accommodates your many moods
No one

But I do, I do
You're just like me
And I'm just like you
Well I do, I do
Cause baby light needs the dark

How can we be
Happy all the time
Lucky all the time
We gotta see
The middle of the night
Just to recognize
The little moments when we see the light
When we see the light
When we see the light
When we see the light
When we see the light

Some say white and gold
Some say the world is black and blue
But no one
Can tell you how to feel or understand your every mood
No one

But I do, I do
You're just like me
And I'm just like you
Well I do, I do
Cause baby light needs the dark

How can we be
Happy all the time
Lucky all the time
We gotta see
The middle of the night
Just to recognize
The little moments when we see the light
When we see the light
When we see the light
When we see the light
When we see the light
