

# Beyond the Iron Sky

Victorius

Our future lies in darkness  
We are damned to agony  
Cross the borders of our world  
To reach our for infinity  
War machines burn down the fields  
We kill to reach immortality  
Praise the kings of disillusion  
Feeding what we call humanity

Rise! Iron, fire and steel  
For our race the future is sealed  
We are breaking the limits of space and time  
Out of the ruins we rise beyond the iron sky

Evolution and deception  
We are bound by mortality  
Do we have the right to play god  
The right to change the history  
Choose your side, is good or evil  
The future lies in our hands  
Make your own decision now  
The sands of time are running fast

Rise! Iron, fire and steel  
For our race the future is sealed  
We are breaking the limits of space and time  
Out of the ruins we rise beyond the iron sky
