Lazer Tooth Tiger

Victorius

Once there was a tiger
A lost and lone survivor
A fallen king of the ancient animals

Extraterrestrial forces
Transformed him
Into a killing machine

Indestructible
Ultimate beast!

Armed with claws
Made of steel
And high advanced technology

From the dark he will rise
Shooting lasers at night
Across the horizon
The tiger will fly!

He will roar, he will fight
Bound for glory and pride
Across the horizon
The tiger will fly!

They try to take his power
But they never control
The ever raging fury in his soul

A beast never surrenders
A beast never obeys
Ready to break the chains again!

Armed with claws
Made of steel
And high advanced technology

From the dark he will rise
Shooting lasers at night
Across the horizon
The tiger will fly!

He will roar, he will fight
Bound for glory and pride
Across the horizon
The tiger will fly!

He is coming to attack
Raging fire in his eyes
For the glory of the king
Lasers in the sky!

From the dark he will rise
Shooting lasers at night
Across the horizon
The tiger will fly!

He will roar, he will fight
Bound for glory and pride
Across the horizon
The tiger will fly!
