

## Starfire

Victorius

Hot winds blowing, they beat up the flames  
Sky spits out glowing embers  
They are ten thousand lightyears away  
And belong to eternity

Starfire, burning souls in the night  
Starfire, like a phoenix from the ashes they will rise  
Starfire, rays of star will ever shine  
Starfire, flash of light, one with the time

See the tears from heaven rain down  
Sparks burn all to the ashes  
The sky opens up a bright light  
And colours the blackened night

Starfire, burning souls in the night  
Starfire, like a phoenix from the ashes they will rise  
Starfire, rays of star will ever shine  
Starfire, flash of light, one with the time

Starfire, burning souls in the night  
Starfire, like a phoenix from the ashes they will rise  
Starfire, rays of star will ever shine  
Starfire, flash of light, one with the time

With the burning night
