

Super Sonic Samurai

Victorius

A shadow faster than the light
Like cosmic fire, his presence is shining in the night
Born from a high technology, too fast for human eyes to see
A soldier made of cybersteel, create to kill the enemy

By neutreon power, he's ready to strike
Can you feel the fire, see the anger in his burning eyes

He's the Super Sonic Samurai
By jetpack power he's ready to fly
He's the Super Sonic Samurai
Laser katana high up to the sky
For the Super, (Super)
Sonic Samurai!

A storm roaring through the night
Silver lightning comes crashing with a saberlight
Ascend from the burning sun, assassinate the chosen one
From the dark side he will come, for revenge he will return

By neutreon power, he's ready to strike
Can you feel the fire, see the anger in his burning eyes

He's the Super Sonic Samurai
By jetpack power he's ready to fly
He's the Super Sonic Samurai
Laser katana high up to the sky
For the Super, (Super)
Sonic Samurai!

He's the Super Sonic Samurai
