

Lose The Night

Vidya Vox

You and me, [?] night
Let's get away for a moment
Hazy, headlights
[?] down the streets like we homeless

Your electric touch
Did I say too much?
When you with me
Do you feel the rush?

If I lose it now with you
Caught up in this feeling now with you
If I lose it now with you
I know we could find something new

If I lose it now with you
If I lose it now with you

You and me, slowly
Dancing alone on the crowded street
Flashes, faded
Can this be more than a memory?

Your electric touch
Did I say too much?
When you with me
Do you feel the rush?

If I lose it now with you
Caught up in this feeling now with you
If I lose it now with you
I know we could find something new

If I lose it now with you
If I lose it now with you

Losing the night deep in your eyes
When you hold me, I can feel it, I can feel it, can you feel it?
Just wanna drive till the sunrise
When we're riding, I can feel it, can you feel it too?

Losing the night deep in your eyes
When you hold me, I can feel it, I can feel it, can you feel it?
Just wanna drive till the sunrise
When we're riding, I can feel it, can you feel it too?

If I lose it now with you
Caught up in this feeling now with you
If I lose it now with you
I know we could find something new

If I lose it now with you
If I lose it now with you
