Mind Control

Vin Jay

Fear my eyes are looking lonesome
Feel me idolizing ones I know that died young
Tears I cry are serotonin
Heal my mind before I've broke, time slows and I'm numb

Take your life, take your time, take your chances
Ain't nobody tryna be stuck standing
And nothing work better than to keep in transit
Hate your lies, love your flaws, give 'em hell
Or take it for granted, thinking I don't know
But I'm finna change your mind with a hint of good vibes
And a little bit of mind con-

-trol, yeah been a day it's all in your mind
-trol, you better turn around and only let it go
-trol, when I say it's all in your mind
-trol, you better turn around and only let it go

I wanna run away some days, run away and never turn back
But if I could escape my fate, I wonder if I would deserve that
So I been tryna find myself and all that's right for me
But all that makes me feel alive is gon' take my life it seems

Chase a facade while I waste my youth, come jump in the unknown
I don't want love 'less it taste like you, I feel like I'm done for
No surprise, I've made mistakes, and I doubt I'll ever change, maybe I don't know
But I'm finna change your mind with a hint of good vibes
And a little bit of mind con-

-trol, yeah been a day it's all in your mind
-trol, you better turn around and only let it go
-trol, when I say it's all in your mind
-trol, you better turn around and only let it go

Chase a facade while I waste my youth, come jump in the unknown
I don't want love 'less it taste like you, I feel like I'm done for
Chase a facade while I waste my youth, come jump in the unknown
I don't want love 'less it taste like you, I feel like I'm done for

But I'm finna change your mind with a hint of good vibes
And a little bit of mind con-

-trol, yeah been a day it's all in your mind
-trol, you better turn around and only let it go
-trol, when I say it's all in your mind
-trol, you better turn around and only let it go

Yeah been a day it's all in your mind
You better turn around and only let it go
When I say it's all in your mind
