Satanism, to most it conjures images of medieval darkness or sinister deeds  
done for the devil  
Simply said, satanism is the belief that evil is excusable and attaining power  
to control people and circumstances is desirable  
Whether you believe in a literal devil is not important in understanding satanism's  
effect in our society  
The evidence is in

Satan worship and satanic cults are growing rapidly, and inherent of these  
ideas are becoming more vocal and more dangerous  
These symbols of satanism are turning up everywhere  
On walls, on clothes, on album covers  
And even on bodies of murder victims
