Daisies

Viola Beach

I'm not going to lie I feel it
Endlessly wondering if you need me
And I'll tell you the truth my dear
I'm not the same man that I was last year, no

I'm not going to lie I need it
Even you must've wondered if you feel it
And then I'll tell the tale of how
I'll be ripping daisies up trying to find out, now

It's girls like you, people write songs about
It's girls like you, you're the reason we let it out
It's girls like you people write songs about

It's girls like you, people write songs about
It's girls like you, you're the reason we let it out
It's girls like you people write songs about

And now I'm standing not at war
Exactly as I pictured it before
Get a glimpse of what it could be
I just think you should lay here with me, now

It's girls like you, people write songs about
It's girls like you, you're the reason we let it out
It's girls like you people write songs about

It's girls like you, people write songs about
It's girls like you, you're the reason we let it out
It's girls like you people write songs about

Oooh woah it's girls like you
Oooh woah it's girls like you
Oooh woah it's girls like you

It's girls like you, people write songs about
It's girls like you, you're the reason we let it out
It's girls like you people write songs about

It's girls like you, people write songs about
It's girls like you, you're the reason we let it out
It's girls like you people write songs about

It's girls like you, people write songs about
It's girls like you, you're the reason we let it out
It's girls like you people write songs about
