

Frailty

VIOLENT VIRA

Take a breath
I won't be here again
Taste what's left
The fruit that you decay
But you won't take the knife when there's blood on the blade
A pomegranate dripping red, a sickening display
I wonder if you heard me while I called out your name
I wonder if you'd kiss me while I lie in the grave

Reputation
A putrid conversation
Never within temptation
Blood won't cleanse you from this hell
Save yourself
I never saw salvation, merely desperation
You know it by now
Cry all you want but god will not save you now

What do you want?
What do you want from me?

The constellation that drove you insane
Never second-guessing if you wanted to stay
You know that it's true so do it
Don't make a sound

Reputation
A putrid conversation
Never within temptation
Blood won't cleanse you from this hell
Save yourself
I never saw salvation, merely desperation
You know it by now
Cry all you want but god will not save you now

Love will save you now
Porque ya no te siento
