

# Cool

Violette Wautier

We got  
Strong chemistry  
A bit of mystery  
I feel the energy yeah

You get  
Under my skin  
Inside my brain  
Are you feeling the same yeah?

Don't call it love but maybe I would for a moment  
You've got that something kinda makes me feel a little different  
About myself  
About myself  
Baby don't look at me

I can't believe I lost my cool  
I lost my cool with you  
I can't believe I lost my cool  
I lost my cool with you  
Boy you drive me crazy I'm losing my mind  
I think about you madly like all the time  
I can't believe I lost my cool  
I lost my cool with you

So suddenly, this reality  
Turned into something  
Out of a movie scene

The words you say to me  
Go straight into my blood stream  
Mix that with whiskey  
Baby you change the state I'm in

You're running through my mind  
Sitting side by side  
But you ain't looking in my eyes  
What are you trying to hide?  
Girl, don't you know what you do to me  
I know you feel from the energy  
I'm trying not to say anything but damn

I can't believe I lost my cool  
I lost my cool with you  
I can't believe I lost my cool  
I lost my cool with you  
Boy you drive me crazy I'm losing my mind  
I think about you madly like all the time  
I can't believe I lost my cool  
I lost my cool with you

Boy you drive me crazy I'm losing my mind  
I think about you madly like all the time

I can't believe I lost my cool  
I lost my cool with you  
I can't believe I lost my cool

I lost my cool with you  
I can't believe I lost my cool  
I lost my cool with you  
I can't believe I lost my cool  
I lost my cool with you
