

Someday maybe, when you can rest your eyes
You know lately it's been no big deal
I'm on top just thinking about it, keeping it rollin in
Never noticed I spend every single minute on it

I'm not leaving, I'm not going
I got everything, it's a simple thing
You may be hurt but it ain't showing
Well I guess everybody gotta go someday
Keeps getting better every time I stay
Fills me up just to hear you say
It's been so good lately

I've been thinking about you lately
Have you been thinking about me lately?
I can see you everywhere lately
That's the way it should be

Somehow I know inside, this is going to take me there
Living in the middle of it, makes it crystal clear
It's no more wondering what I should do
Maybe you noticed I spend every single minute on it

I'm not leaving, I'm not going
I got everything, it's a simple thing
You may be hurt but it aint showin
Well I guess everybody gotta go someday
Keeps getting better every time I stay
Fills me up just to hear you say
It's been so good lately

I've been thinking about you lately
Have you been thinking about me lately?
I can see you everywhere lately
That's the way it should be
Over and over, how much me work
Started to watch as the tables turn
It's all between us and starting to come together,
together, together
Yeah yeah yeah yeah

Lately
I've been thinking about you lately
Have you been thinking about me lately?
I can see you everywhere lately
That's the way it should be
Have you been thinking about me?
Thinking about me baby?
