

[scratching: One People...]  
Essentially one energy under the sun  
"We got to live as one"

[Virtuoso]  
Yo when all forms of payment and educations  
Involve enslavement and degradation  
This wasteful culture will kill us all  
Neanderthals peeping how we live will be appalled  
Hard ministration need to do some reflection  
And make a vaccination for world wide infections  
And let the most disprivileged of us  
Rise from the dust it's a must we increase our trust  
In foreign lands remember every war is planned  
By the hands of the government there on some other shit  
That they won't let us understand  
But keep your selfish ways  
Crime pays and the CIA needs a raise  
The same energies flowing through the leaves of the seas  
Going through you and me see we're O N E  
Skin pigment separations  
A figment of imagination  
A plan regiment for domination

[scratching: One people...]  
Essentially one energy under the sun  
"We got to live as one"  
Essentially one energy under the sun  
"We got to be as one"

[Virtuoso]  
You think acting devilish might settle this problem  
Man how you going to erase hate with hate  
That don't make no sense dollars so dense  
Need to open you mind let some hope in your mind  
Know that its time to show some respect and take a step  
I know its hard but in time it will connect  
Let's build a bridge over troubled waters  
And teach out sons to love our daughters  
Instead of guns and slaughter  
Its clouds sun and water  
Because nature don't hate ya  
So why do you litter hit her and rape her  
The fact of one molecular structure should settle the  
Puncture put in our love our violent settlers  
Focused I notice everything in my dimension  
Like retired pension receivers who once believed in high ascension  
Now they sitting by contemplating  
Were they wrong for taking the stand for the freedom they all been craving

[scratching: One people...]  
Essentially one energy under the sun  
We got to live as one  
Essentially one energy under the sun  
We got to be as one

[Virtuoso]

Its trees leaves the waves from the seas  
And aids the disease even the air we breathe  
Mud blood slug shots from a slug by thugs  
From the hub for the love of money and drugs  
Say it's not what it was but a forward movements perpetual  
I think that a timelines merely conceptual  
It all remains the same they live with aimless brains  
The name is changed but no pain no gain so stains  
Our caskets to influence the masses  
And the government smothers with hypnotic gases  
Politicians make erotic passes  
Youth die in the hottest clashes  
But ones killed is not as fast as  
Gun slingers who could lift you with one finger  
Memories of a sun linger none's bringer  
Who carry your flowers hand on the gun spraying showers  
As one we trying to stand on the sun today is ours

[scratching: One people...]

"We got to live as one"

"We got to be as one"

"We got to live as one"

"We got to be as one"

"One... One... One.."
