

## In The Dark

Vök

Something's there in the distance  
Got me calling for help  
Don't know where I'm destined to go  
I light up a fire, erase the effect  
It's the middle of the night and I'm all alone

I better toughen up, oh no  
I better toughen up, things will get me along  
'Cause there's something in the night, something is there  
I know it can break me apart

Treading water in the dark  
To keep my head above my heart  
Facing all my fears tonight  
Don't wanna hide no more in the dark

A creature in the making is taking a shape  
It's a form that I've seen before  
It feels so familiar but still so rare  
Wanna stay, but it shakes me to the core

I better toughen up, oh no  
I better toughen up, get this under control  
'Cause there's nothing in the shadows, nothing is there  
I know it won't break me apart

Treading water in the dark  
To keep my head above my heart  
Facing all my fears tonight  
Don't wanna hide no more in the dark

I better toughen up, oh no  
I better toughen up, oh no, no, no, no, no  
Treading water in the dark  
I don't wanna hide, hide, hide, hide

Treading water in the dark  
To keep my head above my heart  
Facing all my fears tonight  
Don't wanna hide no more in the dark  
Treading water in the dark  
To keep my head above my heart  
Facing all my fears tonight  
Don't wanna hide no more in the dark
