

Wallow

Void Of Vision

Clean up the mess you made, just so you can leave and fucking s
tart again Leave me left to decay, just to fade away
Get out of here before it's too late
Nothing but glass, ash and these harrowing thoughts sprawled on
this table that used to host us
Question all my blessings Clock ticking, bottle half empty
I re-collect how I could feel us slowly slipping apart How coul
d this ever have happened?
How long has it even been since I've fallen into this rut, that
I'm destined to keep Leave me to pick up the pieces
How long will it be until I can break free from this grief?
When all you've left me with are empty sheets, the lines kept d
iscreet
Oh there's no matter of time, because we'll never see where it
went or how it was spent, loathing the day we ever met
I've learnt to believe in things that I can't see
I'll continue to bite my tongue because it's all I've ever know
n
Will you turn away when I leave it to bleed? Because that's all
I have to show The poison spreads and it halts my pulse
How can I learn to say I'm sorry? When the words surface my thr
oat I choke
