

## Caught It

VOILÀ

When I first heard your name  
My prayers were answered  
Like summer rain but it was over after  
One touch together  
But for a second  
Felt like forever, just know that

I've reread the page  
Do you do the same?  
Hope we never fade  
If we're just

Ships passing the night  
I hope we never see the morning light  
It's crazy how the time just seems to fly  
But for a moment you and I  
We caught it

Hadn't seen your face yet  
But I know those eyes  
You're like a stranger  
That I recognize  
It flashed it flickered  
You couldn't miss it  
But God I'll miss this  
Just know that

I'll find you every time  
In another life  
Til' we get it right  
Guess we're just

Ships passing the night  
I hope we never see the morning light  
It's crazy how the time just seems to fly  
But for a moment you and I  
We caught it

But for a moment you and I  
We caught it

I'll find you every time  
In another life

I'll find you every time  
In another life  
(In another life)

Ships passing the night  
I hope we never see the morning light  
It's crazy how the time just seems to fly  
But for a moment you and I  
We caught it

Ships passing the night  
I hope we never see the morning light  
We're always chasing time like butterflies

But for a moment you and I  
We caught it  
We caught it  
But for a moment you and I  
We caught it
