

## Cursive

VOILÀ

How do you sleep at night?

We, we buried the hatchet right into my back and  
Look what you've done  
The last one that's laughing  
The last one that's standing is the one with the gun  
And I thought you were different  
But you kept a knife hidden in your silver tongue  
You buried the hatchet right into my back and now

I'm slowly building up my throne  
From the sticks and stone you have thrown  
But your words still haunt me like a ghost  
Yeah, mm

How do you sleep at night, night, night  
You made your bed, now lie, lie, lie  
'Cause you cut me in cursive  
I wear every word baby  
Look what you've done, oh  
How do you sleep at night, night, night

We're like a fox and a rabbit  
You're acting like Alice  
You're chasing me down  
With your proverbial damage  
I'm broken and branded and now

I'm slowly building up my throne  
From the sticks and stone you've thrown  
But your words still haunt me like a ghost  
Yeah, yeah

How do you sleep at night, night, night  
You made your bed, now lie, lie, lie  
'Cause you cut me in cursive  
I wear every word baby  
Look what you've done, oh  
How do you sleep at night, night, night

When you were never fed love on a silver spoon  
You learn to lick it off knives, you do, you do  
When you were never fed love on a silver spoon  
You learn to lick it off knives, you do, you do

How do you sleep at night, night, night  
You made your bed, now lie, lie, lie  
'Cause you cut me in cursive  
I wear every word baby  
Look what you've done, oh  
How do you sleep at night, night, night  
(How do you sleep at night)
