

# MATH

VOILÀ

I like that dress on you  
Let's turn into a two for one  
Let's take it off of you  
I'll turn it to my new bedroom rug  
I know you want it too  
But you still showed up here with someone  
And I wonder  
I wonder

When you talk to yourself  
Do you talk with your hands?  
Alone in that house  
My name on your breath  
When you talk to yourself  
Do you talk with your hands?  
Just a thought  
Just a thought

Hey I ain't no good at math  
But one drink and a dance  
Just might be what subtracts  
The self control that you have  
It ain't long division  
I know that you're with him  
But something is missing

A little chemistry  
Will always be a subject we pass  
A lotta history  
Honey, will you see me after class?  
It's just geometry  
The angle you lean over the desk  
Teachers pet  
Teachers pet  
Teachers pet

And when the lights go out  
I wanna own your name  
Wanna spell it out  
And drive me insane  
When the lights go out  
I wanna own your name  
And I know  
That you know

Hey I ain't no good at math  
But one drink and a dance  
Just might be what subtracts  
The self control that you have  
It ain't long division  
I know that you're with him  
But something is missing

Hey I ain't no good at math  
But let me take a guess  
I bet I can subtract  
What keeps a good girl going bad

It ain't long division  
I'll be the addition  
I know what you're missing

When you talk to yourself  
Do you talk with your hands?  
Alone in that house  
My name on your breath  
When you talk to yourself  
Do you talk with your hands?  
Just a thought  
Just a thought
