

## Experiment

Voivod

Loud echoes from the end  
Nothing but a flat lie  
All I need is a new world  
Create my universe

The four basic forces  
Are ready and fixed  
All set to prove myself  
It really exists  
Risk it, try it, find it !

If my body cannot stand  
Don't wanna be born again  
I have enough of my land  
Putting myself in this project  
Within a space that's still secret  
Am I to blame for future fate ?  
A ball of energy, vortex around me  
I have to realize, my theory is wise

The four basic forces  
Are ready and fixed  
All set to prove myself  
It really exists  
Risk it, try it, find it !

I think I've found the way  
I wanna move not stay  
Time is fast and so unsafe  
Conquest is what I can expect  
Without frontiers there's no respect  
The less you give the more I take  
Burst getting stronger  
In atoms smasher  
Powerful magnets  
Interchanges the mass  
Annihilation, a full reaction  
The protons travel in a big circle  
Meeting in this race  
Their mirror-image dematerialized  
Body lost its size  
Tube without exit  
No way out of it  
Micro-galaxies, a lot more to see  
Magnetic fusion  
My self-creation  
I'm in the machine  
Going through my dreams  
Dimension Hatröss
