

Cloud 9

Volbeat

How do you feel?
I know your loss is not an easy thing
I know the pain, it is in our eyes
Recover regret, unfold the ending
Understand the symbolic healing in the mind
We feel it in the lonely night

See the light above you in the night
The memory seems to be aware this time
Please show me the fallen ones
I can't take my eyes off you
I know that they said we all will be fine
Above cloud number nine
Above cloud number nine

How do you feel?
I know it's hurting, an unbearable thing
But life moves on and you will be fine
Get hold of yourself, you're not that lonely
Friends around you will help the healing in the mind
We feel it in the lonely night

See the light above you in the night
The memory seems to be aware this time
Please show me the fallen ones
I can't take my eyes off you
I know that they said we all will be fine
Above cloud number nine
Above cloud number nine

No sign of happiness waiting for you at the very top
They're are only memories of how you got there hallelujah
So make it all worthwhile, do not forsake
What is yours 'cause you're only here today

See the light above you in the night
The memory seems to be aware this time
Please show me the fallen ones
I can't take my eyes off you
I know that they said we all will be fine
Above cloud number nine
Above cloud number nine

See the light above you in the night
The memory seems to be aware this time
Please show me the fallen ones
I can't take my eyes off you
I know that they said we all will be fine
Above cloud number nine
Above cloud number nine
