

The Passenger

Volbeat

We're in a hurry, we're running out of time
Don't wait for no one, tonight's the night
Flashing and dancing and celebrating youth
The portal opens, we're leaving soon

Don't have to worry
I don't mind
Let's go together
You and I

Evolution field
I couldn't leave the other night
Evolution road
I can't leave before I die

Welcome, my darkness, my enemy and friend
I hear you talking, again, again
How many generations do belong to you?
They are all now passing through me by you

Don't have to worry
I don't mind
Let's go together
You and I

Evolution field
I couldn't leave the other night
Evolution road
I can't leave before I die

Evolution field
I couldn't leave the other night
Evolution road
I can't leave before I die
Evolution field
I couldn't leave the other night
Evolution road
I can't leave before I die
