

Burn It Up

Volturian

These mirror walls
Reflect my grudge
Like they could see
Through flesh and blood
The city sleeps and I'm alone
I know tonight I will evolve

Fire will purge away all remains
Of me and you and what we were
Burn just one side
To save the other one
It's head or tails
The toss begins

Death and rebirth
To fight fire with fire I'll
Burn it up, burn it up
Stay here or leave
I'll do with or without you just
Burn it up, burn it up

December mourns its hopeless sons
As sins are buried down below
The only ones to be alive
Come here tonight
I'll show you how

You can live twice
By erasing your mind
To face death with a coin
In your hand
Lost to bring you new life
To let you survive
Just the blink of an eye

Death and rebirth
To fight fire with fire I'll
Burn it up, burn it up
Stay here or leave
I'll do with or without you just
Burn it up, burn it up

Death and rebirth
To fight fire with fire I'll
Burn it up, burn it up
Stay here or leave
I'll do with or without you just
Burn it up, burn it up
