

Lets Me Down

Volumes

Am I blurred enough?
Is there anyone?
Fill me up and say goodbye
Everything around beyond this

Am I good enough?
The way I do, when I see you
You take me somewhere inside
Everything around you comes undone

Let it out before you go away
You learn to love, and it gives you up and it's not enough
Let it out before you go
You never know in life, you never know when it's time
Everything, everyone, lets me down

Is there any love?
Because I'm barely done
We let this time eat us up
Everything around be honest

Can I say enough?
The way we do, when I need you
You make me feel so high inside
When everything around you comes undone

Let it out before you go away
You learn to love, and it gives you up and it's not enough
Let it out before you go
You never know in life, you never know when it's time
Everything, everyone, lets me down

Because everything's better with love reinvented
We're stuck in the middle but I'll take my time

You lied to me, you know you lie, that's my favorite part, but
I
Everything, everyone, lets me down

Lets me down

You lied to me, you know you lie, that's my favorite part, but
I
Everything, everyone, lets me down
