

## Charm And Demand

VOWWS

Are you inside, turning me over, making me blind?  
The sun drifts away  
Another day older, floating in time

I walk in shadows of everything we ever had  
Two songs, written by the same hand  
Long form, winding and vague  
You gave me something that will never go away  
You gave me something that will never go away

Charm and demand  
Taking me over, making me high  
And you're still inside  
The song never ended, words never die

I tried to say the only thing that you can hear  
To make you happen, to see if you would reappear  
I wait for the end of the day  
You gave me something that will never go away  
You gave me something that will never go away
