

# I Think I Remember

VOWWS

You said I think I remember  
You were the carrier, I was the load  
The sky above me was open  
But I was bonded to the ground below

You're in the middle of science and art  
Trying to fix it just pulled it apart

And now my clothing is frozen  
I'm the holder of a dead man's hand  
I got around your inspection  
There's gonna be a new demand

You're in the middle of science and art  
Trying to fix it just pulled it apart

I got your message, I'm thinking it through  
Distance is lending enchantment to the view  
My time is burning a hole in my mind  
Must be the part that wants to see you sometime  
Oh yeah

You're in the middle of science and art  
Trying to fix it just pulled it apart
