

In your hiding place, together again  
I'm alive don't know where or when  
Holding my army together again  
Heart of leather is unfolding itself

Turn myself inside out  
Leave the world with no sound  
Let the sun do its work  
Leave behind what I found  
Help me forget I found who I am  
Wait around in the palm of your hand

Breaking my mind and heart into pieces  
Wait until vacate my cell  
A dream that's turning over to fever  
Under my tongue it's dividing my cells

Turn myself inside out  
Leave the world with no sound  
Let the sun do its work  
Leave behind what I found  
Help me forget I found who I am  
Wait around in the palm of your hand

Help me forget I found who I am  
Wait around in the palm of your hand
