

Saw the writing  
Saw it on your face  
Sense this idol in your place, oh-oh-oh  
Left me standing, standing at the source  
It's a major scare that the prize is yours  
And the darkest star is sold

And you're the bright  
Brightest star of all  
And you're the bright  
Brightest star  
And you're the bright  
Brightest star of all  
And you're the bright  
Brightest star

Oh, take my heart  
Take me to the star  
Science is the art  
Take me to the star  
Take me home  
You that knows it all  
Master of the soul  
Brightest star of all  
Brightest star of all  
You're the brightest star  
You're the brightest star of all

Billions landing, landing at their feet  
Don't you worry, they will take the lead, no?  
Aren't they friends? Give them one more chance!  
It's a major scare that the prize is theirs  
And we still don't understand

And you're the bright  
You're the brightest star of all  
And you're the bright  
Brightest star  
And you're the bright  
You're the brightest star of all  
And you're the brightstar coming down to  
But you're the brightest star

Oh, take my heart  
Take me to the star  
Science is the art  
Take me to the star  
Take me home  
You that knows it all  
Master of the soul  
Brightest star of all  
Brightest star of all  
You're the brightest star  
You're the brightest star of all
