

Genetically Reengineered Repugnance

Vulvodynia

Thee entire human population wreathes down a whirlpool of dark matter
An infinite fractal convolution peeling flesh from bone
A mountainous ball of flesh and bone spiraling into thee Omega
He has a new purpose for us

Every strand of our genetic code dissected and corrected
He has mutilated the human genome
Every strand of our genetic code dissected and corrected
He has mutilated the human genome

Interjecting infinite knowledge from thee ancients into our DNA
With the universe in his hands he has designed us as his army of beasts
Interjecting infinite knowledge from thee ancients into our DNA
With the universe in his hands he has designed us as his army of beasts

Wolfing down our souls
This being takes control
Of our every action as our eyes burst forth from our skulls
Wandering carcasses glowing red with his spark

Contaminated with cosmic knowledge our brains begin to burst through our craniums
Immense limitless thought ravages the mind
Leaving nothing impossible

Spewed back onto earth now we shall the damage we have dealt
Through thousands of years we have decayed this planet to near dust
Spewed back onto earth now we shall the damage we have dealt
Through thousands of years we have decayed this planet to near dust

Now we're ready for consumption
Cleansed of all impurities
Bred to his design
Illuminate conspiracies
Behold his scarlet blight
Be gone obscurities
Cast with all his might
No use we fight

Interjecting infinite knowledge from thee ancients into our DNA
With the universe in his hands he has designed us as his army of beasts
Interjecting infinite knowledge from thee ancients into our DNA
With the universe in his hands he has designed us as his army of beasts

We are genetically reengineered repugnance
Recast in his image our planet shall be a tasty morsel for this beast

A genome swayed into oblivion
We've become his altered atrocities
Wounded by our wrong doings, the cosmos is spewing
Grotesque, Repulsive and Benign
Punished, and punctured beyond function
Injected, and now perfected
