

Feels Like Forever

Vundabar

Danny is your hand, who can do it how he can?
I can tell you everything in a blip
Pressure to the back, it was dirty where we sat
And you're only been in town for a day
Dancing like a bad man, do it with your right hand
Trigger finger's gentle release
Baby in the badlands, lion in the sand
Bitter and unchained melody

So sing to me, sing to me, babe
Speak with your body and swing to me
Ethanol, alcohol, we're burning to the fuse
We're burning to the truth, we're burning up like lovers do
We're burning up like lovers do
We're burning up—

And it feels like, and it feels
And it feels like forever
Yeah, it feels like forever
And it feels like, and it feels
And it feels like forever
And it feels like forever
When there's nothing clever left to say
I can't find you anywhere
I still find you in everything
How it feels

When you sing, how it feels
How it feels when you sing unchained melody
So sing to me, sing to me, babe
Speak with your body and swing to me
Ethanol, alcohol, we're burning to the fuse
We're burning to the truth, we're burning up like lovers do
We're burning up like lovers do
And it feels like forever
And it feels like forever
We're burning up—
