

Flatline

VV Brown

Acidity, on an alkali
Neutralize, bring me off my high
My heart beats every single time
I'm falling 'cause you're on my mind

Lick it, lick, longer with a kiss
Sex and more, this kinetic bliss
It's just physics, sex will nullify
Hospitalize, with your eyes

I've been waiting for your call
Burning from the flatline
I've been waiting for it all
Waiting from the flatline

I've been breaking down your walls
Burning from the frontline
And I hope that I will solve
Waiting on the flatline, line

Burn my orange into my blue flame
It's hot, scorching, no one is the same
I ache when I'm far away from it
Your poison is the kiss between the fix

Pull me in and make you what you want
I'll be right here, give you what you want
My biology mixed with something else
It's life, it's life, with your eyes

I've been waiting for your call
Burning from the flatline
I've been waiting for it all
Waiting from the flatline

I've been breaking down your walls
Burning from the frontline
And I hope that I will solve
Waiting on the flatline, line

Waiting on the flatline
Waiting on the flatline
Waiting on the flatline
Waiting on the flatline
Waiting on the flatline
Waiting on the flatline
Waiting on the flatline
Waiting on the flatline

I've been waiting for your call
Burning from the flatline
I've been waiting for it all
Waiting from the flatline

I've been breaking down your walls
Burning from the frontline
And I hope that I will solve

Waiting on the flatline, line
