

# Ultraviolet

VV Brown

I'm lying on your floor  
With ultraviolet lights  
I'm blinded by your core  
Those ultraviolet lights

So beam  
Out  
You did all

So beam  
Move  
Through sound

Lord

Lonely, lonely  
We are not from this planet  
Not from the space  
Lonely, lonely  
We are not from this center  
Not from this place

Enchanted by your shade  
With captivated rage  
And a broken frequency  
With suffocating daze

So beam  
Out  
You did all

So beam  
Move  
Through sound

Lord

Lonely, lonely  
We are not from this planet  
Not from the space  
Lonely, lonely  
We are not from this center  
Not from this place

Lonely, lonely  
We are not from this planet  
Not from the space  
Lonely, lonely  
We are not from this center  
Not from this place
