

# Let You Go

Wade Hayes

I know a little about a lot of things  
I can turn a wrench mend a fence and bend guitar string  
But they're in the middle of our last goodbye  
I just watched you walk away I still wonder why

Cause I know the difference  
Between right and wrong  
And I know it's foolish  
Us hanging on so long  
And I know you love me  
You made a point to let it show  
And I know it's over  
I don't know how to let you go

We tried and tried but those old ghosts one at last  
And if I could god knows I would go back and fix the past  
I've realized you needed more from me  
Girl, I didn't blame you when you finally set me free

Cause I know the difference  
Between right and wrong  
And I know it's foolish  
Us hanging on so long  
And I know you love me  
You made a point to let it show  
And I know it's over  
I don't know how to let you go

And I know the difference  
Between right and wrong  
And I know it's foolish  
That I'm still holding on  
And I still love you  
I always will I suppose  
And I know it's over  
I don't know how to let you go  
I know it's over  
But I don't know how to let you go
