Good Things

Wafia

Take a picture
It'll last a little longer than the view right now
Stare me up and down
Lot of people
Run away from all the shit that people throwing now
Ain't it funny how

I live for those moments
I love that they notice
That my glow is gold, yeah baby, I'm shining
It's always a good day
To rub you the wrong way
I admire the way you keep on trying

'Cause there's nothing like an enemy
To bring my bullshit out of me
Boosting up that energy
To remind me I got good things going
Nothing like an enemy
Simmering in that jealousy
All it ever does to me
Is remind me I got good things going on

I got good things going on (Yeah, yeah)
I got good things going on

How you doing?
Hear you mumble in the back, feel a type of way
Say it to my face
'Cause the truth is
I'ma feed off the dream of the things you said
Tonight I'll be sleeping like a baby

I live for those moments
I love that they notice
That my glow is gold, yeah baby, I'm shining (Shining)
It's always a good day
To rub you the wrong way
I admire the way you keep on trying

'Cause there's nothing like an enemy
To bring my bullshit out of me
Boosting up that energy
To remind me I got good things going
Nothing like an enemy
Simmering in that jealousy
All it ever does to me
Is remind me I got good things going on

I got good things going on
I got good things going on
I got good things going on
I got good things going on

It's always a good day
To rub you the wrong way
I admire the way you keep on trying

'Cause there's nothing like an enemy
To bring my bullshit out of me
Boosting up that energy
To remind me I got good things going
Nothing like an enemy
Simmering in that jealousy
All it ever does to me
Is remind me I got good things going on

I got good things going on
I got good things going on
I got good things going on
I got good things going on
